Forecast for Sunday 25 Aug 2024

Weather: Mainly fine with isolated showers during the early hours of Sunday morning. Turning cloudy into daybreak, with cloud lowering down to the mid-ranges with a period of rain expected over west-facing ground in particular. Drier throughout in the east but still rather cloudy. Rain becoming lighter and more intermittent later in the day, but remaining windy with gales in exposure.

Chance of cloud-free hill tops above 800m: 80% falling to 20% or less by afternoon.

Low Cloud and visibility: Early cloud over the highest ground should thicken and lower. Becoming blanket at 600 metres by lunch and broken at similar heights later. Good in early hours becoming moderate or poor in rain and drizzle and very poor in cloud.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Windiest conditions later in the day with summit gusts well into gale strength.

Forecast for Monday 26 Aug 2024

Weather: While becoming warmer through this period, some uncertainty at present about the rate of ingress of cloudier and eventually wetter conditions from the west. Keeping abreast of the forecast advised. Isolated showers giving way to sunny spells. More generally cloudy later. Rather strong southwesterly winds.

Maximum wind: Increasing southwesterly with gusts 50-55mph over summits by evening.

Chance of cloud-free hill tops above 800m: 20% or less Monday morning and evening, becoming 70% for a time in middle of the day.

Low Cloud and visibility: Broken to overcast base 300 metres in morning and evening, breaking to scattered base 800 m for a time in middle of the day.

Temperature: **Valleys:** Plus 8 becoming 17 degrees Celsius.
At 800m: Plus 6 to 10 degrees Celsius.
Freezing level: Well above summits.
